Motor Vehicle Injury Prevention Training

___ December 11 | 8:30 - 4:30 | Prioritizing MVIP Interventions

Prioritizing MVIP Interventions is a 1-day class that provides the resources and strategies to build a motor vehicle injury prevention program. This class is customizable to the tribe's needs to prioritize motor vehicle injury prevention interventions. Modules are designed to meet tribes at their current level of injury prevention programming. Using the public health approach, participants define the problems their communities want to address, identify risk factors, create prevention strategies to address the problem and implement an evaluative process. Participants gain practical experience through presentation, discussion and hands-on exercise for prioritizing motor vehicle injury prevention and the public health approach.

___ December 12 | 8:30 - 4:30 | Strategies to Increase Restraint Use

This 1-day class provides certified National Child Passenger Safety Technicians and Instructors new strategies to increase seat belts and child safety seat restraint use. Learn new technologies and strategies to change outcomes in your community. Child Passenger Safety recertification seat sign off is available for all technicians needing to recertify. Keeping certified technicians current and up to date is a great strategy to increase restraint use.

___ December 13 | 8:30 - 4:30 | Basic Child Passenger Safety Awareness

Basic Child Passenger Safety Awareness is a 1-day training class that provides a basic introduction to Child Passenger Safety (CPS) in Indian Country; SNAP. Students gain practical experience through a variety of presentations and hands-on exercises related to vehicle seat belt systems, various types of child restraints (car seats), and the misuse of child restraints. The Basic Child Passenger Safety Awareness Course does not offer certification and does not replace or serve as a substitute for the 32-hour National Standardized Child Passenger Safety Technician Training Program course offered by Safe Kids Worldwide. Participants who complete SNAP will be eligible to receive professional developments (PDs) from Indian Health Service.

___ December 14 | 8:30 - 12:00 | Car Seat Checkpoint

How to Conduct a Car Seat Checkpoint training is a 3.5 hour class that provides a basic introduction to conducting a car seat checkpoint. Students gain practical knowledge through presentation and class discussion related to event and program planning, child passenger safety roles and goals, event marketing and partnership building.
