## MOTOR VEHICLE INJURY PREVENTION

### **December 4 | 8:30 – 4:30 “PRIORITIZING MVIP INTERVENTIONS”**

Prioritizing MVIP Interventions is a 1-day training package that provides the resources and strategies to build a motor vehicle injury prevention program. This training package is customizable to the Tribe’s needs to prioritize motor vehicle injury prevention interventions. Modules are designed to meet Tribes at their current level of injury prevention programming. Using the public health approach, participants will be able to define the problems their community wants to address, identify risk factors, create prevention strategies to address the problem and implement an evaluative process. Participants will gain practical experience through presentation, discussion and hands-on exercise for prioritizing motor vehicle injury prevention and the public health approach.

### **December 5 | 8:30 – 4:30 “STRATEGIES TO INCREASE RESTRAINT USE”**

The Strategies to Increase Restraint Use is a full day class that provides certified National Child Passenger Safety Technicians and Instructors new strategies to increase seat belt and child safety seat restraint use. Learn new technologies and strategies to change outcomes in your community. Child Passenger Safety Recertification sign off will be available for all technicians needing to recertify. Keeping certified technicians current and up to date is a great strategy to increase restraint use.

---

### **December 6 | 8:30 – 4:30 “SAFE NATIVE AMERICAN PASSENGERS”**

Safe Native American Passengers (SNAP) training was developed by the Indian Health Service (IHS) Injury Prevention Program to provide safer transportation for Native American children in tribal communities. Basic Child Passenger Safety Awareness is a 1-day training class that provides the SNAP curriculum. Participants will gain practical experience through a variety of presentations and hands-on exercises related to vehicle seat belt systems, various types of child restraints (car seats), and the misuse of child restraints. The Basic Child Passenger Safety Awareness class does not offer certification and does not replace or serve as a substitute for the 32 hour National Standardized Child Passenger Safety Technician Training Program course offered by Safe Kids Worldwide. Participants who complete this SNAP curriculum will be eligible to receive professional developments (PDs) from the Indian Health Service

### **December 7 | 8:30 – 12:00 “CAR SEAT CHECKPOINT”**

How to Conduct a Car Seat Checkpoint training is a half-day class featuring in-classroom and hands-on activities, providing a basic introduction on how to conduct a car seat checkpoint. Participants will gain practical knowledge through presentation and class discussion related to event and program planning, CPS roles and goals, event marketing and partnership building.
